

2025 SEPTEMBER

NEWS LETTER

Welcome to September! As students and faculty return to campuses, the focus naturally shifts to creating a productive and safe learning environment. This back-to-school season, we're highlighting the critical role that clear, reliable visual technology plays in enhancing campus security. From security command centers to public spaces, GVision is committed to providing the clarity needed to keep educational institutions secure.

CASE STUDY

In busy hardware stores, protecting high-value inventory is a top priority. To enhance their security, the store installed a GVision IP PVM, providing a highly visible, crystal-clear video feed of the aisle. This simple addition serves as a powerful and modern deterrent, helping to reduce shrinkage while maintaining a professional and secure shopping environment.

GVision **IP Public View Monitor (PVM)** is the ideal **all-in-one** security solution, featuring:

- ▶ **Power over Ethernet (PoE):** Single-cable installation for both power and data.
- ▶ **ONVIF Compliant:** Ensures seamless integration with existing VMS/NVR systems.
- ▶ **Full HD 1080p Resolution:** Delivers a crisp, high-definition security feed.
- ▶ **Embedded Linux/Android OS:** Allows for powerful and flexible standalone operation.
